

Terrazzino System

SPEC SHEET

Terrazzino uses a cost-effective formula and straightforward application process to achieve the elegance and beauty of terrazzo and granite — a possibility that's never been realized until now.

This self-leveling system combines the Terrazzino powder blend with a two-component, 100% solids, clear epoxy binder, producing a cutting-edge formulation that delivers a simple yet stunning alternative to terrazzo or granite in one application. Effortless and uncomplicated, the Terrazzino system can replace the rigorous, extensive task of traditional terrazzo installations, while still mirroring the timeless appearance of polished concrete.

Whether you want to create something new, or revitalize the outdated, Terrazzino is the key to beautifying infinite spaces.

System Layers

1. Substrate
2. Terrazzino Moisture Vapor Control *or* Terrazzino Fast Set Primer
3. Terrazzino High Build Epoxy (base coat)
